Vial Adapter

Basic Type & Dual-Head Type

FDA 510(k) clearance and CE MDR certification

Basic Type

This product is a single-use and sterile medical device intended for the transfer of drugs contained in a vial. Puncturing the elastomeric closure of a vial is achieved by means of an integral plastic spike located in the center of the vial adapter. The needle-free operation provides both safety and convenience for healthcare professionals.

- Touch-free packaging maintains sterility
- Available for 13mm and 20mm closure vials
- The spike can be siliconized on demand
- Options for vial-first or syringe-first packaging

Dual-Head Type

The product consists of a female luer adapter and a male luer adapter, enabling simple and vial-to-vial transfer for the reconstitution of lyophilized drug products. The reconstituted drug is available for immediate aspiration into the syringe used for injection.

- Ideal for lyophilized drugs provided with fixed-volume diluent vials
- Easy to use
- Diluent flow restrictor to prevent foaming
